

Now's the time  
to put us to the test

# Steadplan

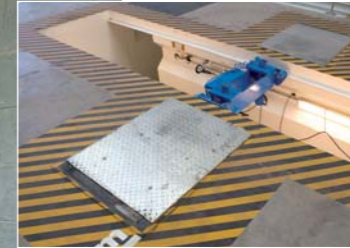

**WE CAN, WE DO**

# The very best MoT facility in the North West

Your truck needs its MoT, and you need the work carrying out speedily, efficiently and cost-effectively.

The result of a £150,000 investment, Steadplan now offers the most comprehensive and up to date MoT facility in the North West, with the ability to perform all necessary pre-checks (in a separate bay) as well as the actual test itself. Designed for all sizes of trucks and trailers, we can also handle specialist vehicles such as hazchem and petroleum spirit tankers and low floor buses. So whatever your MoT requirement, Steadplan has the solution.

**Roller Brake Tester**  
Directly updateable from the Swansea database, our latest technology VLT brake tester analyses every aspect of brake performance, and provides a full print-out of results achieved.

**Shaker Plates**  
To maintain the highest standards of road safety, hydraulically operated shaker plates test for excessive lift and movement in steering axle shackles and king pins.

**Full Length Pit**  
Designed for safe and easy use, our 11m pre-fabricated pit features a 20 tonnes pit jack as well as integrated stairways with entry and exit points at each end.

**Headlamp Tester**  
Our headlamp tester checks for not only beam alignment, but also for lamp clarity and brightness.
